1) Responses are based on local standard business days and working hours. Unless otherwise stated, all responses are measured from the time the Customer calls until HP has either established a mutually acceptable time for support to be performed, or HP has begun to provide On Site support or remote diagnostics. See paragraph 6 entitled "Response Times" for more terms and conditions about response times within HP travel zones.

3) Standard Bench warranty means repaired by HP or a HP dealer at its designated repair center.

4) Warranty service is limited to repair or replacement of defective Software media or materials only.

6) HP does not support products manufactured by another company and distributed by Hewlett-Packard. The original product manufacturer provides support. Software warranty services from HP are limited to replacement of defective Software media or materials. Customer should contact and/or register with the product manufacturer to receive any additional warranty and support coverage information that may be available.

14) Parts only warranty means HP will supply the Customer with a replacement part in exchange for a defective one. HP may, at its option, waive the requirement for the Customer to return the defective part.

16) The item is warranted against manufacturing defects in material or workmanship only.

31) Site preparation service included with installation.

36) Phone-In Assistance (PIA). Software telephone support provides access to HP technical resources for the period specified in the Product documentation commencing on the date of delivery to the original end-user. Examples may include: advice on proper installation, setting up Software configuration parameters, Software features, solutions to known problems, and information on the interpretation of Product technical documentation.
